To Whom it May Concern:

Dear Sirs,

**RE: TDI USE OF ARMTRAC EQUIPMENT**

---

I refer to the above matter, and confirm that The Development Initiative Ltd, a UN accredited Mine Action organisation with demining operations in several theatres around the world has, for the past 4 years, used Armtrac Mechanical Demining Systems in Southern Sudan, a particularly harsh and tough theatre in which to operate.

TDI is of the opinion that the Armtrac systems that we deployed, were reliable and effective mechanical demining system when used in an appropriate role. TDI continues to operate one mechanical system in South Sudan at the present date, and this machine has been a great asset to the clearance program as a whole. Whilst conducting clearance operations our Armtrac detonated a number of anti-tank mines, resulting in minimal damage and operational downtime.

Should you have any further queries then please do not hesitate to contact me.

Yours faithfully,

Hugh Morris  
Operations Director  
The Development Initiative Ltd
