To Whom This May Concern

This letter highlights the strong business relationship between the Executive Secretariat for the Demining and Development of the North West Coast and its long standing and loyal supplier Armtrac ltd, headed by Managing Director Mr. Steve Brown and located at 70 reach Road, Burwell, Cambridgeshire CB25 0AH.

Armtrac has been supplying the Exec. Sec. with mechanical demining equipment since 2011, which allowed for the development of a strong business relationship. We have received three machines and are expecting two more. The equipment is of high quality and the company provides training and additional resources to support the efficient operation of the equipment in Egypt.

The company strives to deliver high quality products which are designed to operate under harsh working conditions. Armtrac machines are known for their versatility and effectiveness. Originally, Armtrac machines are meant to operate as mechanical demining machines. However, by using quick hitch couplings on their boom arm, they can also operate as engineering and construction toolkits (in and out of the high threat areas). Therefore, Armtrac machines are a good investment because of their multipurpose characteristic.

We have been satisfied with Armtrac's products and we value the relationship we have with the company and their skillful personnel.

Yours Sincerely,

Ambassador Fathy El Shazly
